### Explanations Not Excuses: Using Imaging and Artificial Intelligence for Better Outcomes and Communication

In today's rapidly progressing dental landscape, advanced imaging and artificial intelligence (AI) are transforming how dentists communicate with patients and streamline diagnoses. But how do you leverage these tools and apply them with wisdom to enhance clarity, build trust, and improve outcomes without getting lost in the tech?

This relevant course led by Dr. Kyle Reeves explores how evolving imaging technologies and AI-driven tools can elevate patient communication, outcomes and practice efficiency. From digital radiographs and cone beam computed tomography to AI-assisted diagnostics, learn how to integrate these innovations into your practice to provide clear explanations, not excuses, for treatment plans and potential clinical scenarios. Dr. Reeves, with over two decades of experience in clinical dentistry, and expertise in oral and maxillofacial radiology, shares practical insights and real-world applications to help you harness technology for better patient engagement and clinical success.

#### Learning Objectives

- Review examples of 2D and 3D radiographic anatomy and pathology that may have clinical implications
- Examine nuances of CBCT acquisition, interpretation, and communication
- Contemplate artificial intelligence and its role in clinical practice
- Consider verbal and written informed consent guidelines based on imaging findings

### Kyle L. Reeves, DDS

Dr. Reeves owned and operated a small, four operator fee-for-service general dental practice in the Fort Worth, Texas area upon graduating with his DDS from the University of Texas Health Science Center San Antonio in May of 2000 until he sold the practice in April of 2022 due to medical issues that affected his ability to practice general dentistry. He also consulted for the Texas State Board Dental Examiners Dental Review Panel from 2017-2021 writing opinions from the perspective of a practicing general dentist on various clinical issues related to public board complaints. In June of 2025, he completed an oral and maxillofacial radiology residency at Stony Brook School of Dental Medicine. He now participates in private practice oral and maxillofacial radiology and is assistant professor in the Department of Diagnostic and Biomedical Sciences at the University of Texas Health Houston School of Dentistry. Dr. Reeves enjoys spending time with his family, traveling, outdoor activities, watching YouTube videos, and reading.

**ADA CERP®** Continuing Education Recognition Program  
Suffolk County Dental Society is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at [www.ada.org/goto/cerp](http://www.ada.org/goto/cerp).
