Complications with implant prostheses: Prosthetic management and prevention

Course description: Implant restorations can present challenges for new and seasoned dentists in practice. From single to full arch restorations, implant prostheses can have unique issues which much be managed by the restorative dentist. Careful treatment planning between the surgical and restorative dentist is integral to reducing complications. Proper diagnosis and communication with the dental laboratory technician are critical in designing and providing treatment. Restorative design and components must be carefully selected to ensure a successful prosthesis.

This lecture will emphasize the necessity for treatment planning of surgical and restorative procedures. Emphasis will be placed on the importance of implant provisionalization, prototypes, and utilization of technology in planning effective restorations.

Learning Objectives

1. Utilize information from digital technology to plan with surgeons, restorative dentists, and lab technicians.
2. Utilize virtual design to treatment plan solutions using screw retained restorations, angled screw channels, abutments, etc.
3. Solutions for material issues, implant screws.
4. Understand the importance of a provisional, verification jigs, and prototypes.
5. Minimize issues with implant access points, and material selection.

Dana Marzocco is a Long Island native and completed her doctorate at Tufts University School of Dental Medicine in Boston, Massachusetts. Upon completion of a general practice residency (GPR) at Montefiore Medical Center, she decided to pursue specialty training, receiving her certificate in Postgraduate Prosthodontics from New York University. Subsequently Dr. Marzocco then completed a two-year implant fellowship at the same institution. Dr. Marzocco joined Academic Prosthodontics of Long Island in 2014, Appointed a Clinical Assistant Professor at Stony Brook University Dental School in Stony Brook, New York, she is involved in teaching a fixed prosthodontics course, and supervises patient care in the dental clinic. In addition, she is involved in implant research. Presently she is involved with local study groups, and is a member of multiple dental associations. Dr. Marzocco has lectured for study groups, multiple residency programs, and given presentations at national dental research meetings
