

# Annual OSHA-Mandated Update for Dentists, Hygienists and Staff: What You Need to Know to Comply with the Law

Presented by PETER MYCHAJLIW, D.D.S.

**OSHA 29CFR Part 1910.1030 States: Personnel Subject to Occupational Exposure Should Receive infection control training (OSHA employee safety) on Initial Assignment, When New Tasks or Procedures Affect Their Occupational Exposure, and at a Minimum Annually.**

**Updated information on COVID-19, Bird Flu, Measles, M- Pox, Syphilis, and other pertinent pathogens will be discussed. UPDATED OSHA POSTERS, EMPLOYEE SAFETY DATA SHEET QUICK CARDS, GLOVE/MASK Requirements**

**This Course Requirement is Separate from the NYS Mandatory Infection Control Re-Licensure Requirement of Every Four Years for Dentists and Hygienists.**

**EDUCATIONAL OBJECTIVES & GOALS:** The Occupational Safety and Health Administration (OSHA) is responsible for ensuring safe working conditions for all employees.

In 2016, OSHA made a **major update to the MSDS/SDS** (material safety data sheets/ now safety data sheets) labeling requirements and employee training that required mandatory office compliance after June 1, 2016, including additional documentation requirements. OSHA constantly develops new solutions and standards to protect employees from injury and illness. It is the **responsibility of employers to stay up-to-date on any OSHA changes** to aid in compliance, or face possible fines and costly claims that could lead to lawsuits. **Dentists, and their employees should update themselves at least annually** and place appropriate documentation into their office manuals.

The **goal of this course is to inform attendees of the OSHA changes.** The mandatory updates will be discussed in detail that will help guide the practitioner, hygienist and staff comply with the mandate that was instituted in 2016, and other changes that have occurred after that date.

**OFFICE STAFF ATTENDANCE OPTION:** Practitioners are encouraged to bring their staff members to the meeting (live or virtually) to facilitate compliance; otherwise, practitioners must fabricate their own document acknowledging dissemination of this update to their staff and place such documentation into the office manual.

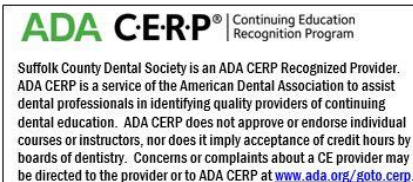

\*\*\*If an employer brings staff to the meeting a separate employer/employee training attestation document (that the employer and staff will sign or attest to virtually at the end of the course depending on venue) will be given or emailed to the employer to place into their office manual. Employers and their employees must be present together (live or virtually). Employees must be linked to employer practice location. Employer address and email must be provided.

**EDUCATION METHODS:** In order to provide an effective learning experience, Dr. Mychajliw will be utilizing a slide presentation, providing reference links to educational materials, and a live question and answer session review opportunity.

**DISCLAIMER:** Please be aware that any information in the course or questions, communications are NOT to be taken as legal or authoritative advice and that health care professionals are ultimately themselves fully responsible for ADHERING TO THE MOST CURRENT INFECTION CONTROL/OSHA STANDARDS or any action that they deem to take or refrain from taking in these matters.

**DATE: Wednesday December 3, 2025, 10am-Noon (2 ce credits)**  
**PLACE: 150 Motor Parkway, Hauppauge NY, 11788 Lower Level Media Center**  
**COST: ADA members \$150; Dental Staff \$50; non-ADA dentists \$300**
